Mobile Boosters

Do you want to increase mobile coverage, have faster internet speeds and better voice quality?

Slow internet speeds on your mobile device are often caused by low signal. If you suffer from low signal in your office and find it frustrating trying to access your email or the internet a coverage booster is your answer.

A coverage booster is designed to amplify and disperse a mobile signal within a building without causing any interference to the mobile network. All you need is somewhere indoors with poor signal, simply place a coverage booster box at this location and enjoy great reception.

Benefits of a Mobile Booster

1. Enjoy better calls with higher voice clarity

Signal boosters amplify mobile network signals giving your mobile phone better signal strength to make clearer calls with reduced noise and distortion. New signal boosters minimize technical noise in voice calls offering you a clearer and improved voice over the phone.

2. High productivity

Most mobile phone signal boosters also support simultaneous multiple calls. Receive every urgent call without an issue. By amplifying the signal, your data speeds will increase dramatically. Email, internet, video and call quality will be like you are right under a cell tower.

3. Faster internet and stable connectivity

Connect to the internet from where you are and enjoy a stable and uninterrupted connection. you can experience a problematic mobile broadband internet experience due to various reasons. Large buildings with thick concrete walls can stand as barriers to network signals. installing a signal booster can alleviate the problem effectively.

4. Easier to install and Maintain

A signal booster can be installed without expert support. It consists mainly of two components. The antenna which receives mobile network signals and transmits it to the amplifier, and the amplifier which improves the signal strength and retransmits it. Mobile phones and other devices can receive amplified signals in the operational areas.

5. High selectivity and affordability

Signal phone boosters are available in various models for your exact requirements. You can select and purchase a suitable booster according to your needs.

About us

With a portfolio unequalled in its breadth and flexibility, over 30 years' experience and three national offices, Evotec are committed to designing, implementing and supporting innovative technology solutions based on the unique requirements of your business.
