

Polaris' new HD Wireless™ headset delivers clear, crisp, pure and comfortable HD Wideband sound quality. Its stylish good looks and ultimate user control and Unified Communication convenience make it an ideal tool for the modern office communicator. Key features include up to 150m wireless range and up to 13 hours talk time, a fast-charge function and total acoustic protection from loud noise.

And it's so reliable, it comes with a three-year warranty!

### **Desk-phone and PC Connectivity**

The communications experience via the HD Wireless extends beyond the desk-phone and into the rapidly growing world of Unified Communications. With desk-phone / PC connectivity, the HD Wireless gives headset users access to UC applications such as Microsoft® Lync™ and Cisco® WebEx® as well as VoIP and other soft-phone applications.

### **Excellent HD Voice Quality**

150Hz – 8KHz Audio bandwidth using Wideband and IP telephony. Digital Sound Processing (DSP) technology provides leading HD Wideband voice processing in any wireless headset and ensures excellent intelligibility and sound quality.

### **Intuitive Touchscreen Control**

The large, user friendly 3.5", 320 x 240 resolution touchscreen provides instant and intuitive control over volume, microphone level, tone, display, mute, PC/ Desk-phone Switcher and conference calling.

### **Dual Connectivity**

Switch from Desk-phone to PC. The Phone/PC functionality is perfect for users that still use desk-phones but also need to access web-based audio documents, participate in webinars and conduct PC based video conferencing.

### **DECT Wireless Range**

You can move up to 150m away from your desk while on a call (standard office environment) or over 200m away (line-of-site).

Fearlessly multi-task while on a call – retrieve documents from the printer, fetch refreshments, do some yoga.

### **All-day Talk Time**

The headset battery delivers:

- 13+ hours talk time in narrowband mode
- 9+ hours talk time in wideband mode

The inbuilt Dynamic Range Control in the HD Wireless headset automatically adjusts the amount of battery power it uses according to its distance from the base. The closer it is, the less battery power it uses, making sure you get the most life out of your headset battery.

### **Fast Battery Recharge**

If you forget to put it on the charger overnight, the HD Wireless headset has Fast Battery Recharge ensures you're able to use your headset with minimum downtime.

- 0% – 50%: 1 hour
- 0% – 100%: 2 hours

### **Talk and Charge**

Simultaneously talk on one HD Wireless headset while charging another. The HD Wireless headset allows you to charge a second headset and continue talking on the primary headset without any interruption to your call. This minimises headset battery downtime and supports simple yet affordable desk sharing.

### **Designed for comfort**

The HD Wireless headset is extremely lightweight and has been designed for all day comfort.

- Ear hook – 22g
- Headband – 44g

### **Better hearing – sounds more professional**

The HD Wireless headset's noise-cancelling microphone minimises background noise so that your voice is transmitted clearly. The mic's boom length has been designed to boost its performance and reduce wind noise. This is important for noisy, open-plan offices where people work in close proximity.

### **Loud Noise Protection**

The HD Wireless headset protects you from long term exposure to loud noise. You can set call decibel limit to be lower than the ACIF G616 Guidelines and meet the requirements of the National Standard for Workplace Noise NOHSC:1007:2000. There is also a

wideband acoustic limiter in the headset and “Shriek Rejection” software in the headset base.

**Multi-unit Conferencing**

Conduct conference calls or wireless training on up to 4 headsets. The HD Wireless’ intuitive touchscreen provides you with a simple interface to easily initiate and conduct conference calls and wireless double-jacking.

**Touch Pairing**

Instant headset recognition. Simply dock your headset to the base for pairing to occur. Touch pairing makes desk sharing, double-jacking and phone conferencing quick and easy

**Remote Call Control**

The Electronic Hook Switch (EHS) connects to your telephone and wireless headset base enabling you to answer and end calls while away from your desk by simply pressing a button on your wireless headset.

Handset Lifter enables you to answer and end calls while away from your desk by simply pressing a button on your wireless headset.

**Compatible with Unified Communications**

The HD Wireless headset is easy set up on any desk-phone or business communications application, PC or Mac, and it’s compatible with Microsoft Office Communicator and Microsoft Lync™.
